4

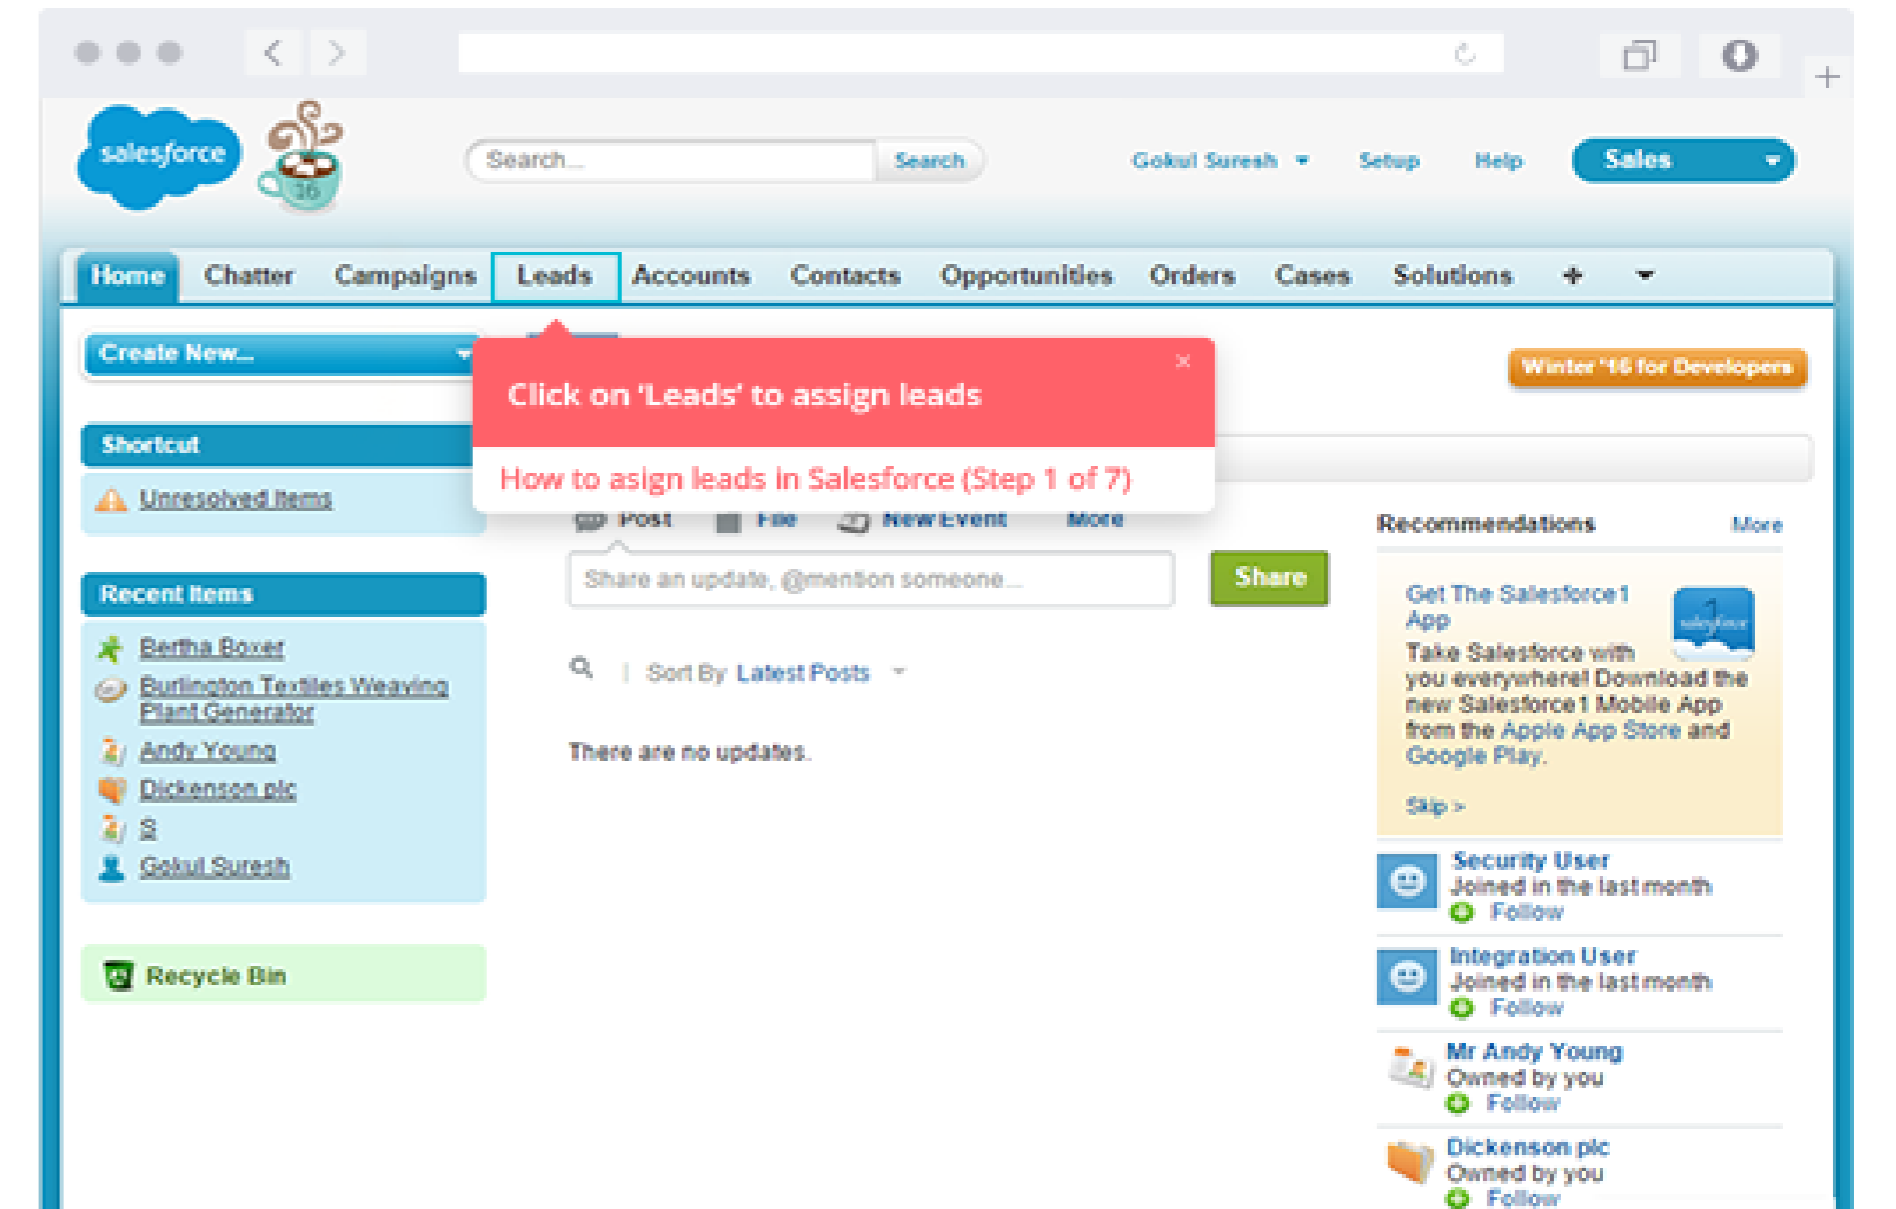

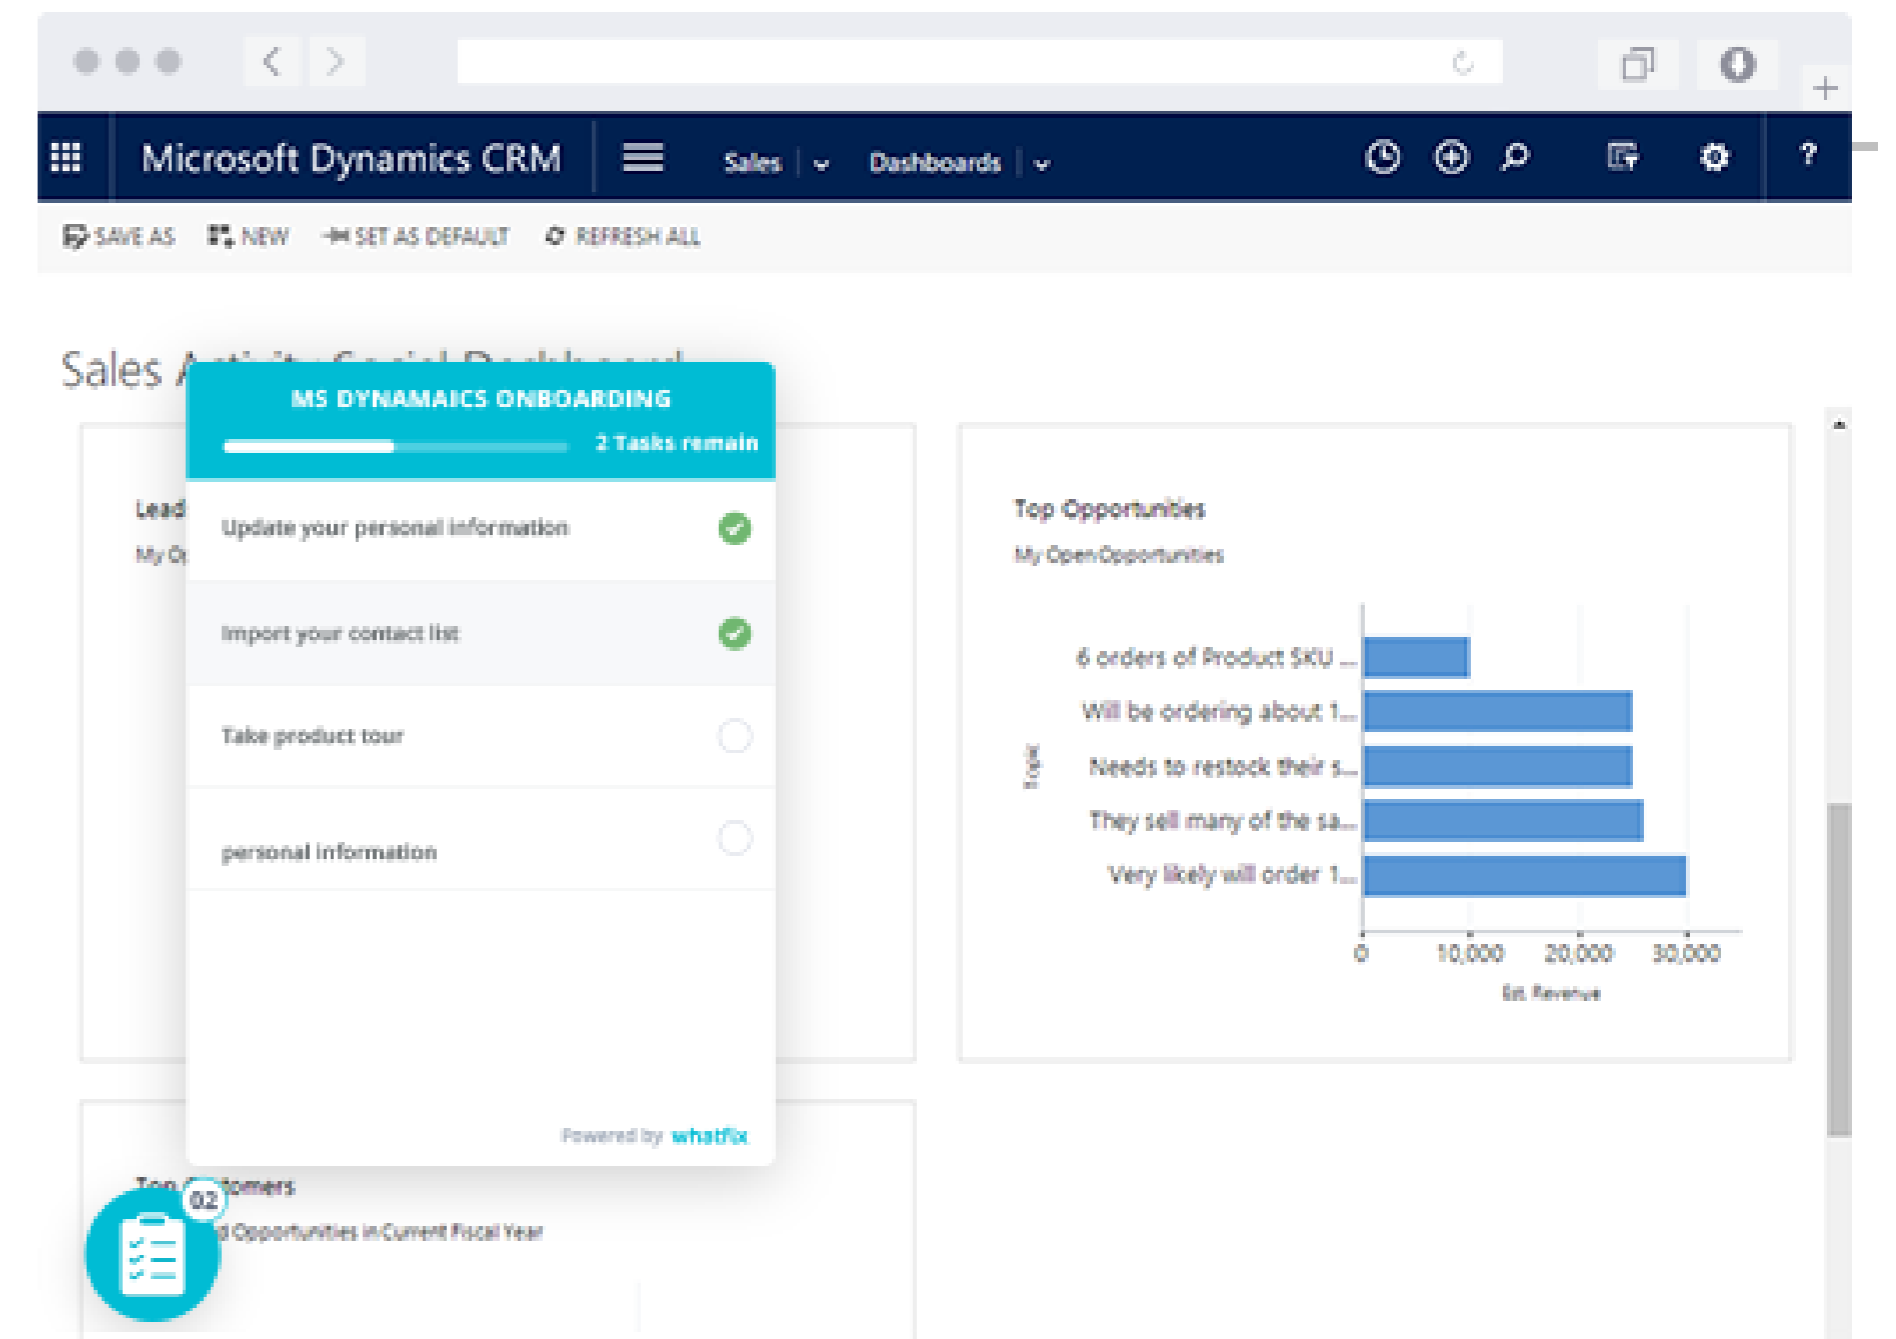

Performance Management

- Just-in-Time and Always Available
- Contextual and Personalized
- Quick Authoring & Deployment

5

Change Management

- Boost Employee Productivity
- Effortless Software Migration
- Interactive Contextual Help & Support

Actifio: storage system

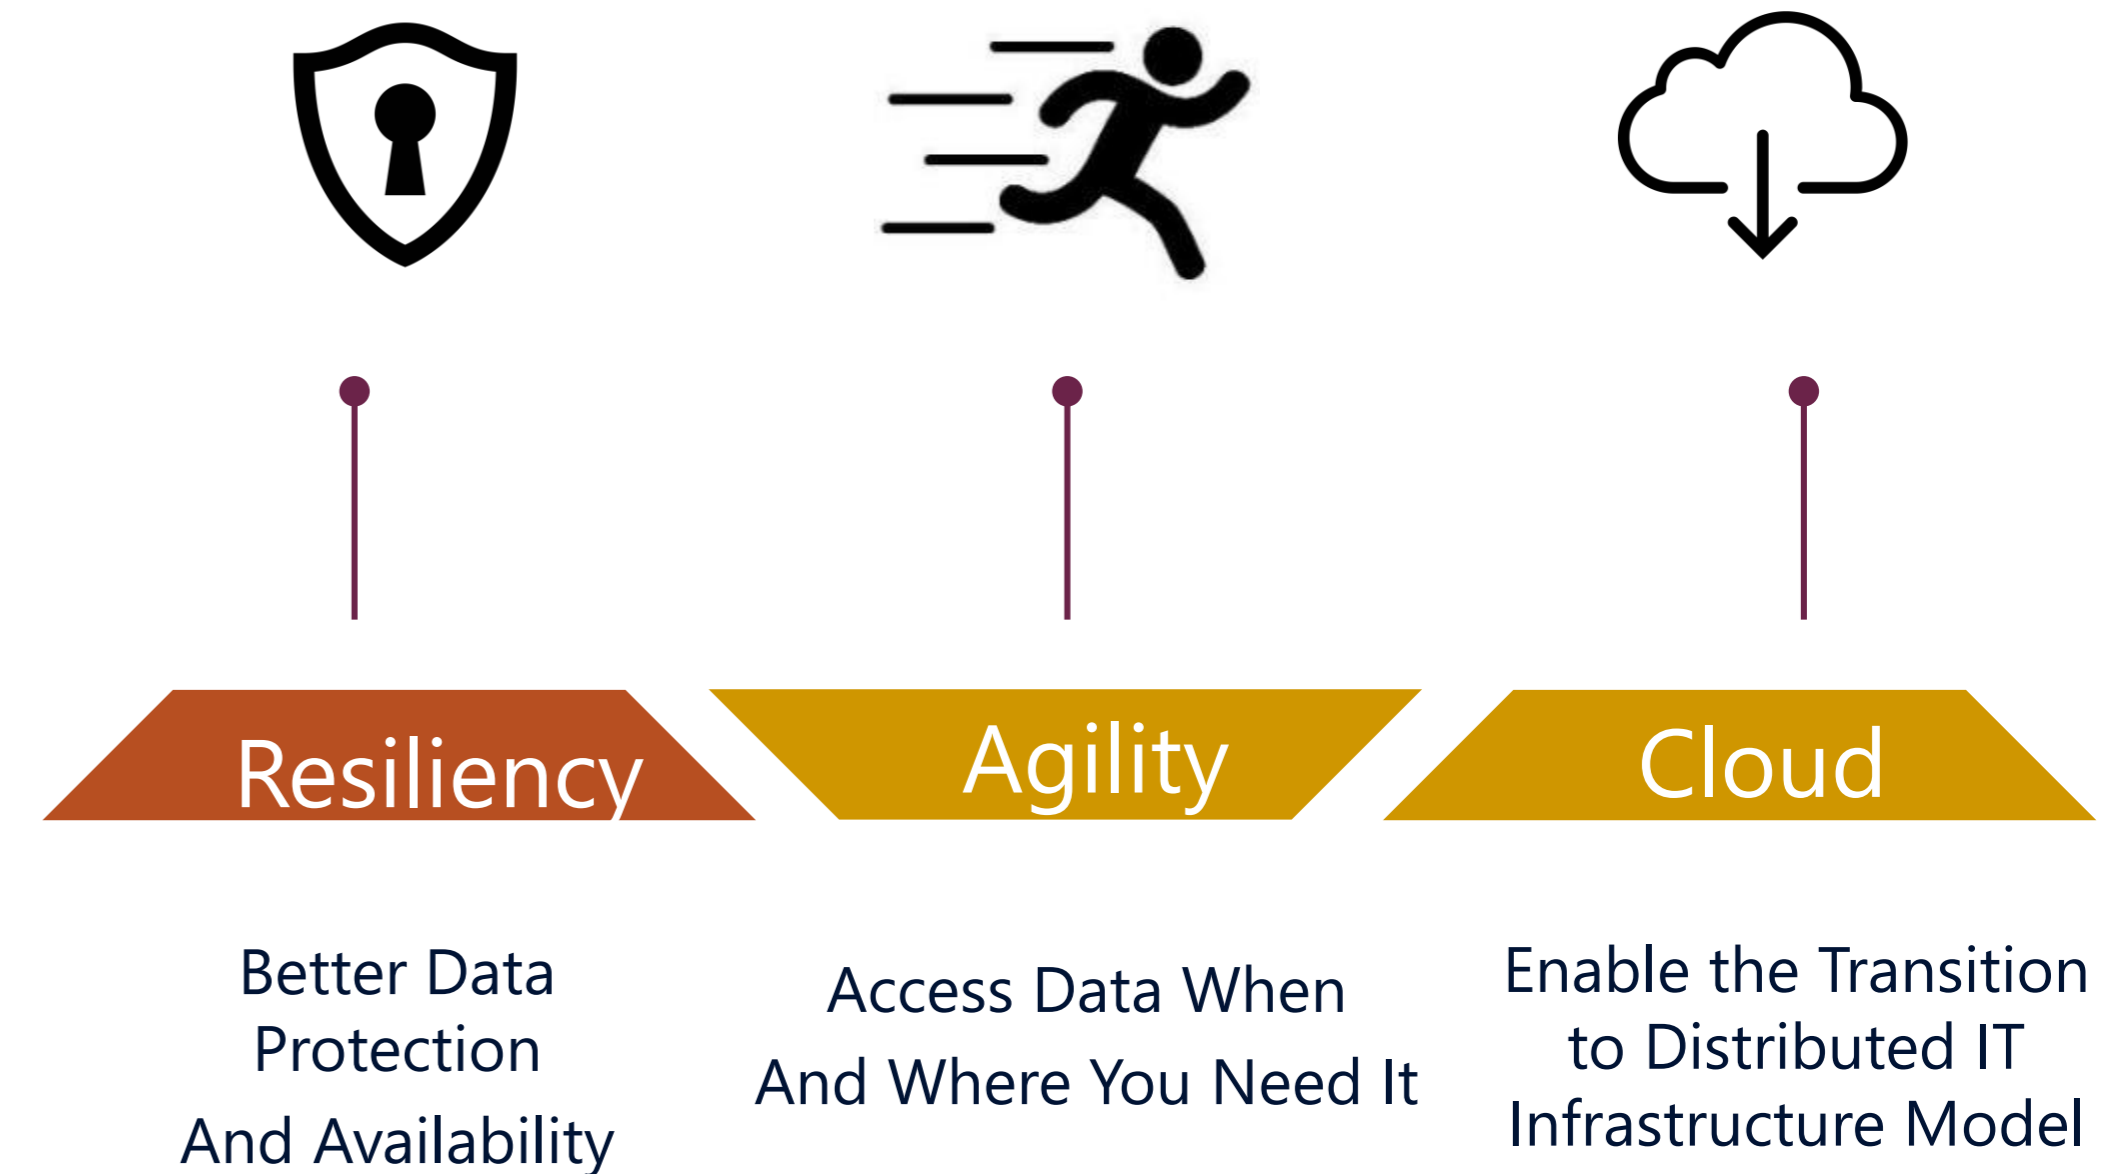

Product description:

Actifio's storage system enables to reduce unnecessary duplication of application data and software requirements for its users. The technology is designed to maintain data integrity while ensuring rapid access to that data throughout its entire life cycle. The system virtualizes data management and storage to replace siloed data protection and availability applications with a single purpose-built system. The process involves creating a "**golden master**" of production data that allows for a rapid manipulation and recovery of data if needed.

Features:

- Copy Data Virtualization
- Data-as-a-Service
- Disaster Recovery

actifio
Radically Simple

What Can Actifio Do for me

Actifio's capabilities overcomes these challenges. Actifio data virtualization software manages and provides virtual point-in-time copies of application data, instantly, on-premises, or in a public, private or hybrid cloud,

- For Backup, Disaster Recovery (DR)
- For Test Data Management (TDM) for application development or DevOps,
- For Analytics, BI or Data Warehousing, or
- For migrating data and workloads between infrastructure resources.
- Satisfy all of the above requirements with one platform, one license, whether it's used in multiple public clouds, private data centers, remote offices or an MSP site.

Benefits of Actifio:

-  recover multi TB db.
-  build apps fast **#devops**
-  modernize BU & DR
-  leverage public **#cloud**
-  migrate apps to the cloud
-  consolidate data centers
-  provision hundreds of virtual **#DB** clones in minutes
-  automate **#DR**
